

Your help is needed in preserving an important and critical historical landmark in the Mineral Wells area. Please consider the following very carefully and participate as much as you or your business feels is possible.

In 1984, the threat existed that the Fannin School (the old Mineral Wells High School) could be leveled. Due to the tremendous efforts of some concerned citizens and former MWHS students, the structure was saved. Very good but limited work has been contributed to preserve the school to-date.

Today the 50 Year Club exists to promote and preserve our many high school reunions and restore the old high school building and surrounding facilities like the amphitheater as a National Historic District.. Their goal is to restore the school in a way that we can all be proud of our accomplishments by providing for a community center facility creating jobs and economic development. The club is working hard to succeed with this goal but the entire community will certainly be needed to reach the goal of having a museum and a multipurpose community facility that will serve Mineral Wells and all of us well.

The preservation of this facility will not only save several important buildings in Mineral Wells but will provide the community with a beautiful auditorium that can be the inspiration to revitalize our community. Outstanding stage lighting and sound facilities are planned so that a variety of venues can be served.

Your time and money are needed. Monetary contributions can be made to the 50 Year Club by mailing the attached form to the club's office with a check enclosed. Your contribution will be tax deductible of course. Remember that you and all your co-workers can also personally join this effort with time contributed by simply providing your name, address, phone number and email address for us to reach you. You may not be contacted immediately because a large number of activities are contemplated for the future and will require many individual hours of work. This must be a total community effort to be successful.

The 50 Year Club will be making a special effort to recognize the badly needed contributions of time and money so make sure that you or your business plays a part in this important effort. Your money and time contributions will be used carefully and appropriately as we move forward with this important community project. Please be a part of it.

Thank you.
